

INTRODUCING **POLYBENDER**

Polybender is an internal copper tube bending system designed to quickly and easily create kink free bends in soft annealed copper pair coil. Can be left inside to protect copper tube during first fix construction.

3 Metre Lengths (in clear bags)

- 3/8" Yellow:** PB38-3M
- 1/2" Red:** PB12-3M
- 5/8" Blue:** PB58-3M
- 3/4" Green:** PB34-3M

25 Metre Lengths (on spool)

- 3/8" Yellow:** PB38-25M
- 1/2" Red:** PB12-25M
- 5/8" Blue:** PB58-25M
- 3/4" Green:** PB34-25M

Just 3 Easy Steps to Perfect Bends

Polybender has been designed to offer the installer fast, easy and quality 'kind-free' bends.

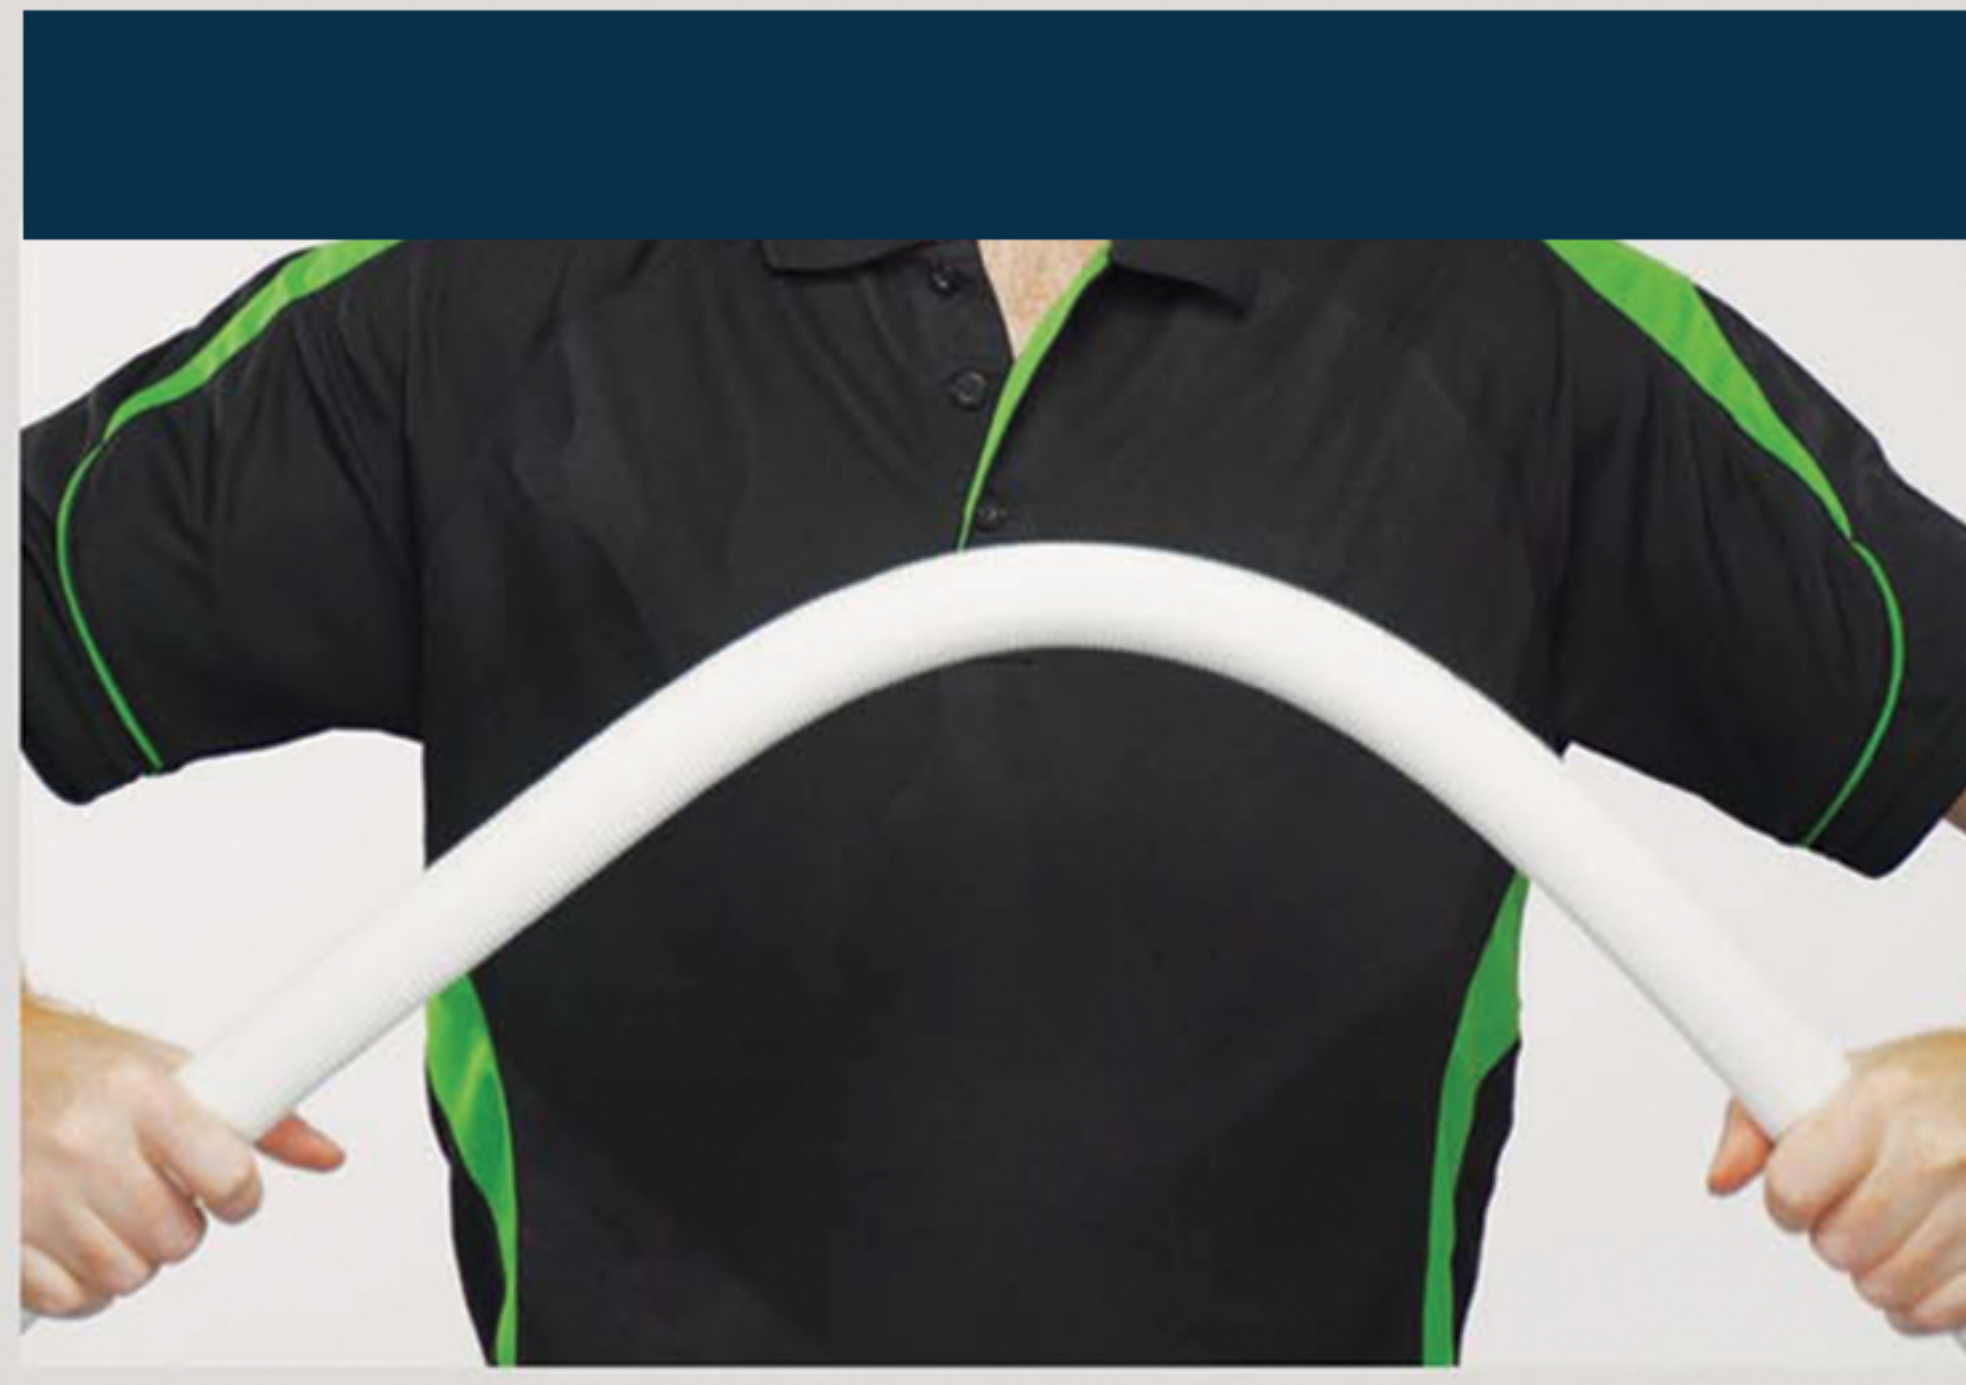

The tool has been specifically engineered for use as an internal copper tube bender and can handle intense repetitive stress due to sharp bends with no negative impact on the tool's physical properties.

Due to the low friction finish, extraction after bending is easy and your Polybender will provide fast and effective bends time and time again.

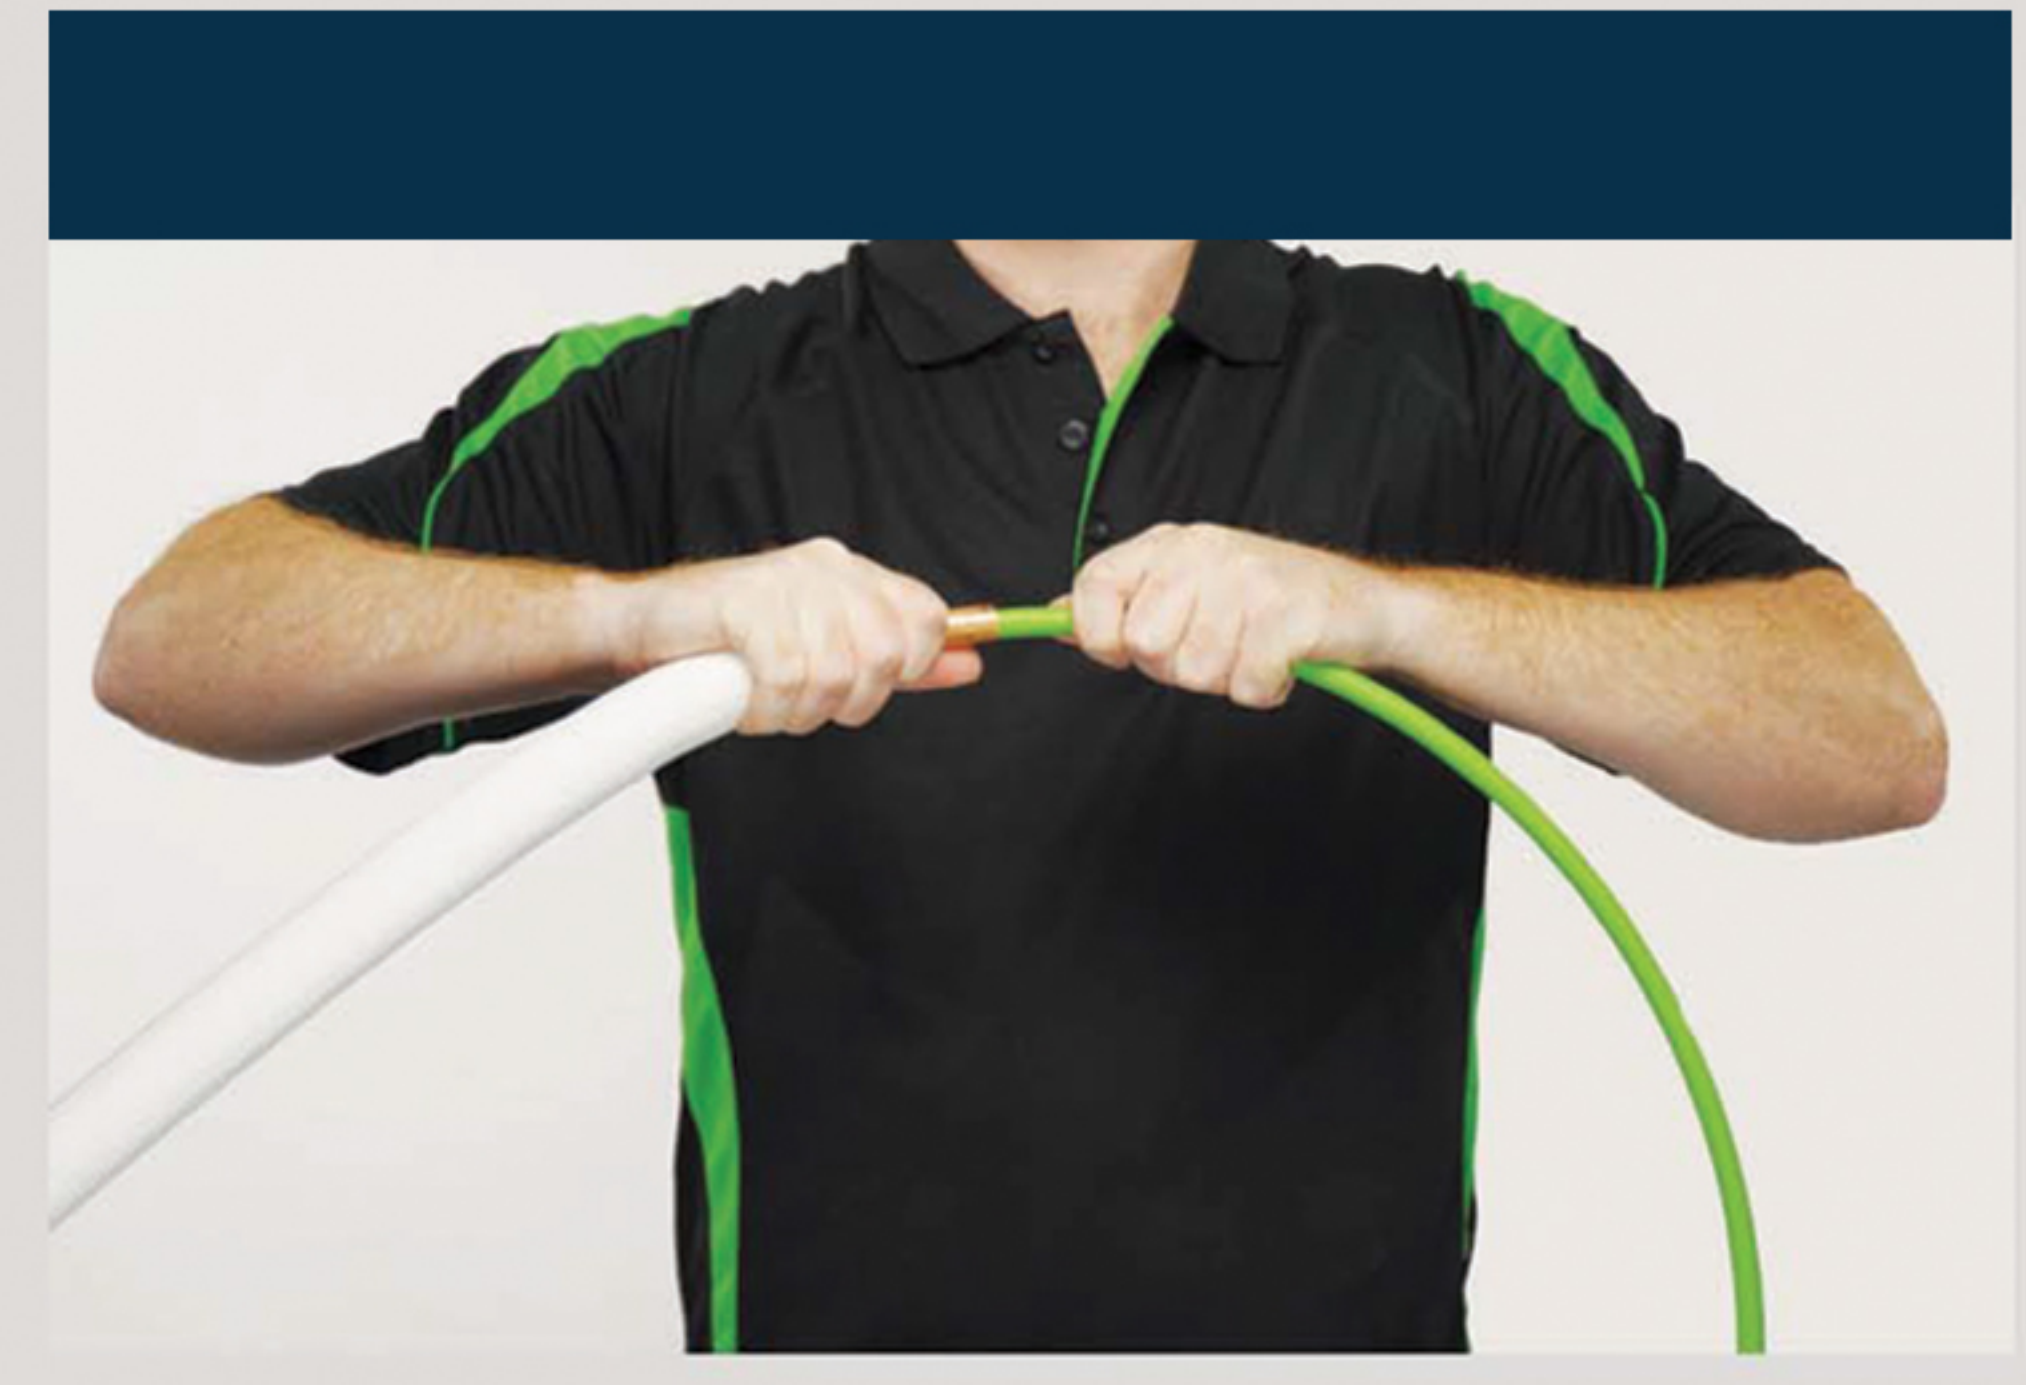

Step 01

Insert Polybender past the desired bend point.

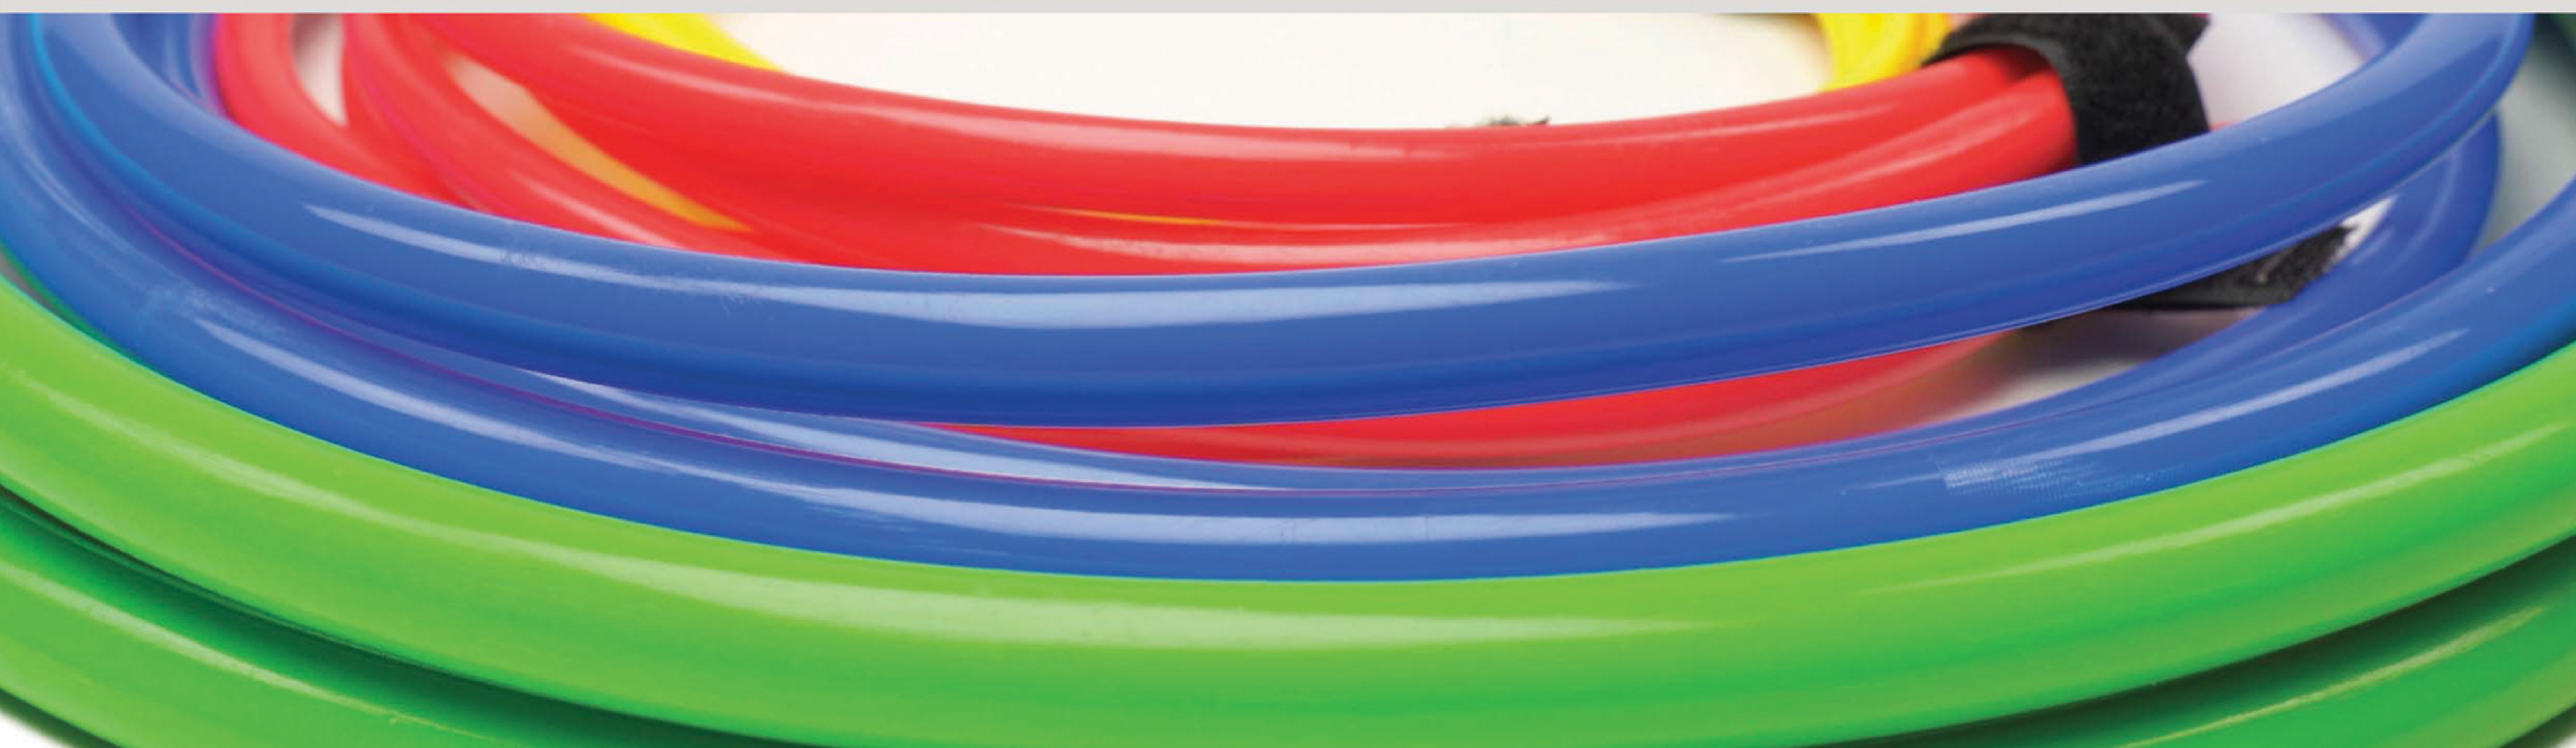

Step 02

Bend the pipe to where it needs to be.

Step 03

Extract and finish connection.
