

VETO PRO PAC®
TOOL BAGS THAT WORK

TOOL BAGS THAT WORK.

2019 CATALOGUE

OUR PHILOSOPHY.

A tool bag should perform some basic functions: First, it should keep your tools where you can easily get to them. Secondly, it should protect them at the job site, on the way to the job site and everywhere in between. And finally, a tool bag should make carrying tools comfortable.

But first things first. Like anything that's built to last, VETO PRO PAC tool bags start with a butt-kicking foundation. In this case, it's a 3mm thick polypropylene base that is not only waterproof, but drop from the second floor proof. Next we oriented the storage system vertically using interior pockets made of PVC-impregnated 1800 denier, a waterproof nylon that can take whatever a flathead or Phillips head screwdriver can dish out.

ABOUT ROGER.

After working as a carpenter for over 25 years, I became fed-up with the various tool-carrying devices available on the market. In my view, they all fell short: from metal or plastic boxes to soft-sided mason bags that hold tools in a horizontal pile up. In these configurations, unnecessary tool hunts result in "D & D" (dig or dump) and challenge your patience as you search for the tool you need.

Attempts at improving tool carrying and storing have been made over the years, such as pocketed fabric inserts that fit in and around a 5-gallon bucket. However, the "deep" pockets aren't deep enough, tools stored in the exterior pockets are exposed making transportation and storage awkward, and a pile up of interlocking tools on the inside hint at the handicaps of the other bags.

Storing the loaded bucket in your truck requires a clear and secure area, and if not wedged or bungeed, "LFT" (Loose Flying Tools) occurs with sudden stops. It can be a real mess especially if the bucket bottom has become a catch all for left over nails and drywall screws. It is because of this long list of frustrations that I created VETO PRO PAC.

Roger Brouard, Owner VETO PRO PAC

THE VETO DIFFERENCE

// **ERGONOMIC DESIGN**

Comfortable, over-molded rubber grip and folding, hinged handle

// **RUGGED CONSTRUCTION**

Industrial strength double nylon stitching, PVC-impregnated 1800 denier body fabric, and oversized YKK® zippers

// **MAXIMIZED STORAGE CAPACITY**

Patented, sturdy center panel design for balanced weight distribution and vertical, tiered tool pockets for easy visual identification and access

// **MARINE-GRADE RIVETS**

Built to stand up to the rigors of professional use

// **DURABLE WATERPROOF BASE**

3mm thick polypropylene offers wear and moisture protection with vertical stability

FIVE YEAR WARRANTY.

VETO PRO PAC warrants that its merchandise will be free from defects in materials and workmanship for a period of five (5) years after date of original retail purchase. Veto Pro Pac's warranty extends to the **original owner** and Veto Pro Pac's obligation from this warranty is limited, at its option, to repairing or replacing defective merchandise. Abuse or neglect are not covered. Damage due to wear and tear will be repaired at a reasonable charge.

TOUGH. DURABLE. FUNCTIONAL.
